- jQuery

PROFILE

"I am an adaptable individual capable of collaborating effectively with diverse teams. I thrive in an environment where enthusiasm prevails over excessive formality. My capacity to maintain composure in high-pressure situations ensures that stress does not compromise my professional

performance. My passion lies in coding, and I relish the intellectual challenge of problem-solving. I possess a penchant for rapid acquisition of new skills and embrace the exploration of emerging technologies.

Presently, I hold the position of Senior Fullstack Developer at Quint, where I contribute as an integral member of a team entrusted with the development and upkeep of Quint's B2B/B2C websites and APIs. My expertise extends to the establishment and management of servers and websites, utilizing platforms such as AWS, Cloudflare, and Laravel Forge.

I am actively seeking a fresh opportunity to further advance my career."

EMPLOYMENT HISTORY

Employer: **Quint group, Cape Town**
Job Title: **Full stack developer**
Period: **November 2021 - Current**

Duties & Responsibilities:

Software Debugging and Enhancement:
- Proficiently identify, diagnose, and resolve software issues within our website and API.
- Continuously optimize and enhance features to ensure user satisfaction.

Server and Website:
- Skilfully orchestrate the deployment and configuration of servers and websites, employing platforms such as AWS, Cloudflare, and Laravel Forge.

Code Review and Quality Assurance:
- Play a pivotal role in the software development lifecycle by meticulously reviewing and assessing pull requests.
- Maintain high coding standards and ensure the delivery of error-free, efficient code that aligns with project objectives.

Projects
- **Laravel**: Development of a B2C website and API backend.
- **VueJS**/**NUXT**: Frontend development for B2B/B2C websites.
- **Backpack**/**Nova** (**Laravel**): Administration development.
- **Lambda**: JavaScript/TypeScript development.

Employer: **Achievement Awards Group**
Job Title: **Analyst developer**
Period: **January 2017 - October 2021**

Duties & Responsibilities:

Systems Support, Maintenance, and Enhancement:

- Diligently provide ongoing support, maintenance, and enhancements to critical systems, ensuring their uninterrupted functionality and optimization.

Application Improvement and Design Recommendations:
- Actively contribute to the evolution of applications by suggesting and implementing improvements to enhance their functionality, user experience, and design aesthetics.
- Engage in strategic planning to align applications with evolving business needs and industry trends.

Mentorship and Guidance:
- Overseeing and mentoring junior team members.
- Provide valuable guidance and support to nurture their professional growth, fostering a collaborative and knowledge-sharing work environment

Projects
- **WordPress** (PHP, jQuery, CSS): Development of websites.
- **C#:** Development of API services with Oracle database integration.
- **PHP**: API development utilizing the Fat-Free Framework.
- **Oracle**: Database development encompassing procedures, functions, and packages.
- **AWS**: Integration of S3/SNS into an API service.
- **ExtJS**: Frontend development for the call centre application.
- **React Native**: Mobile application development.

Employer: **Achievement Awards Group, Cape Town**
Job Title: **Analyst developer - Intern**
Period: **July 2016 – December 2016**
